

Coming Next Month in DOG FANCY

February 2008

FEATURES

Love your dog's teeth. Your dog's mouth is an important but often overlooked aspect of her overall health. We fill you in on what could be missing from your routine.

Westminster — gotta love it. There's more to the dogs at Westminster than just a pretty face. We go beyond the glare of the spotlight to see what top show dogs are like outside the ring.

Love me, love my dog. Finding the right guy is hard enough, but it can become infinitely more difficult when your dog is convinced he's the only partner you need. We give you advice on how to make your life big enough for three.

PLUS

Snow sports. Combine one of your favorite sports with your favorite companion, and you've got an activity called "skijoring."

Fall for these fashions. Valentine's Day doesn't just have to be about candy and cards. Give your dog the warm fuzzies with holiday-appropriate apparel and accessories.

Love — no matter what. Aging is natural, but it seems to happen to our dogs overnight. We guide you through the unique challenges of having a blind, deaf, or otherwise handicapped senior dog.

BREEDS

Meet the gentle Labrador Retriever, the courageous Dogo Argentino, and the faithful Kerry Blue Terrier.
