

## Repelling Mosquitoes

### **Sidebar: Shoo Away Mosquitoes**

You can't kill every mosquito that approaches your home, but you can take steps to limit your dog's exposure: Add a pump, bubbler, or water circulator to your backyard pond and birdbath to keep water from stagnating and providing ideal mosquito breeding grounds. Don't let water stand in empty flower pots, bowls, and old tires. Run your swimming pool filter regularly. Use gravel or sand to fill in marshy, stagnant areas.
