

Health Vision

How your dog's five senses shape his world.

A number of illnessesystemic diseases as well as primary ocular maladiescan cause your dog's vision to deteriorate. Protect your dog's vision by feeding a proper diet, vaccinating, preventing lead exposure, and seeking prompt treatment for eye trauma. Should your dog's eyes change in appearance or if he starts bumping into objects, even if only at night, bring him to your veterinarian for an eye evaluation.
