

Training Overview: The Poodle Puppy

Keep these three tips in mind when training the Poodle puppy.

1. The come command is one of the most important lessons that your Poodle will learn, and you can start teaching him early on in the form of fun games with you.
2. Socializing your Poodle will be easy; he's a true people magnet! Exposing him to different people, animals and situations as a puppy will help him to grow up well adjusted and confident.
3. Encourage your puppy's good behavior and good habits by keeping him out of trouble. In a safe confined area, with all temptation out of reach, he has no choice but to be a good boy.
